AMENDMENTS TO THE CLAIMS

Listing of claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Claim1 (Currently amended):   In a load handling crane for transport of containers between receiving and delivery locations, the improvement residing in: at least two non-pivotal trolleys onto which the containers are positioned; ~~and~~ rail means for guiding simultaneous movement of the trolleys between said locations passing each other along vertically spaced travel paths to effect said transport of the containers; wheeled frame means for support of the rail means; and cable means fixedly anchored to the frame means for exclusively suspending the rail means therefrom.

Claim 2 (Currently amended):   The load handling crane as defined in claim 1, wherein said rails means comprises: a boom having a pair of laterally spaced upper rail tracks establishing one of said travel paths and a pair of laterally spaced lower rail tracks establishing the other of the travel paths, said ~~and~~ wheeled frame means supporting ~~for support of~~ the boom extending in a horizontal position between said receiving and delivery locations.

Claim 3 (Currently amended): The load handling crane as defined in claim 2, wherein said wheeled frame means includes: laterally spaced legs having lower and upper ends between which the boom extends; said ~~and~~ cable means interconnecting the boom with the upper ends of the legs being fixedly anchored thereto for suspension of the boom in said horizontal position.

Claim 4 (Currently amended): The load handling crane as defined in claim 3, including pivotally displaceable spreader means operatively mounted on the non-pivotal trolleys for reception and delivery of the containers at said receiving and delivery locations.

Claim 5 (Currently amended): The load handling crane as defined in claim 1, including pivotally displaceable spreader means on the non-pivotal trolleys for reception and delivery of the containers at said receiving and delivery locations.
